

Taryan Mathews

As a second-generation alpaca breeder, Taryan has grown up alongside the Australian Alpaca Industry. Now running a 600-head operation alongside her husband Max, their stud - Precision Alpaca Group - encompasses decades of breeding experience in both Huacaya and suri of all colours.

Having completed the Australian Alpaca Association's judging intake in 2019 and being actively involved in events and workshops across Australia, Taryan has dedicated herself to the industry right from the start. She is committed to ensuring a prosperous and vibrant future for alpacas, with a dedication to continued education and a love for talking about all things alpaca!

Taryan has a passion for breeding the highest quality fibre on strongly conformed frames in all colours. She loves the versatility of alpaca fibre and the natural shades and patterns it comes in, and loves nothing more than to see it carried on robust, healthy alpacas.
